**Tarrant County Behavioral Health Data**

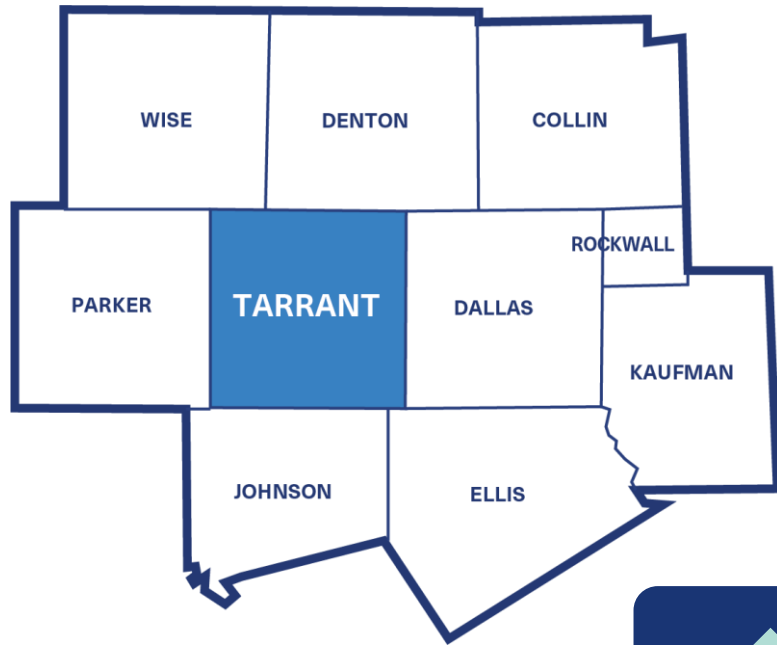

**Compiled in Fall 2023**

# Our Data Partner

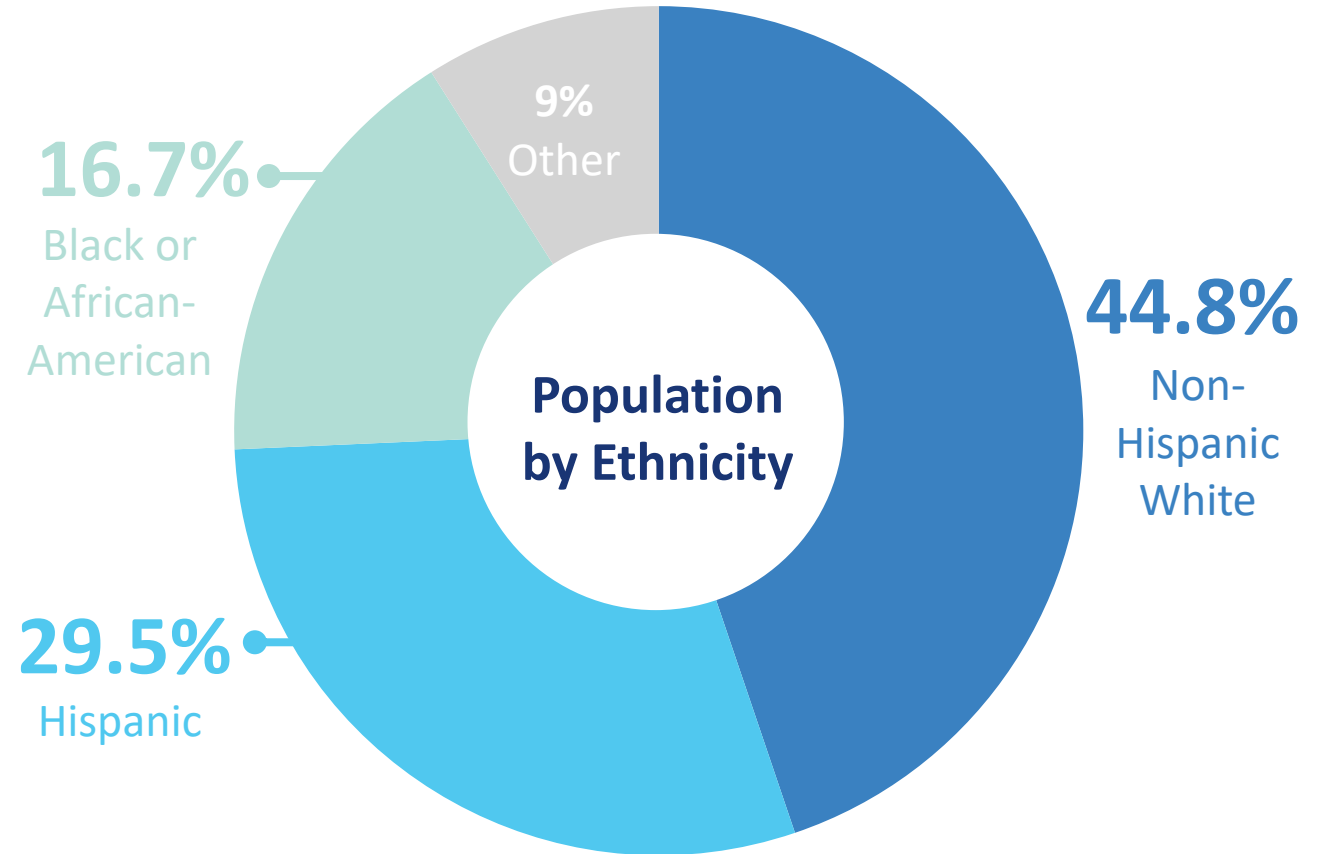

The Institute for  
Urban Policy Research  
at The University of Texas at Dallas

# Tarrant County Population 2021

Total Population  
**2,090,612**

**↑**  
**5.4%**  
Increase the  
last 5 years.

# Population by Age 2021

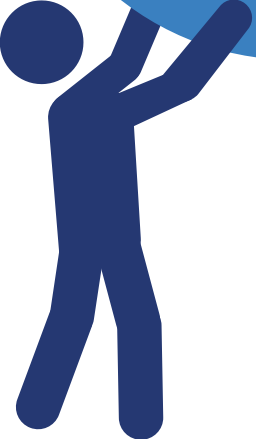

Though the changes are slight, the Tarrant County population is aging.

The fastest-growing segment of the population is those aged 65-84.

↑  
14.4%  
Increase from 2017-2021.

# Population by Age and Ethnicity 2021

The White, non-Hispanic population is demonstrably older than other groups.

More than **1 in 8** members of this group are between 65-84.

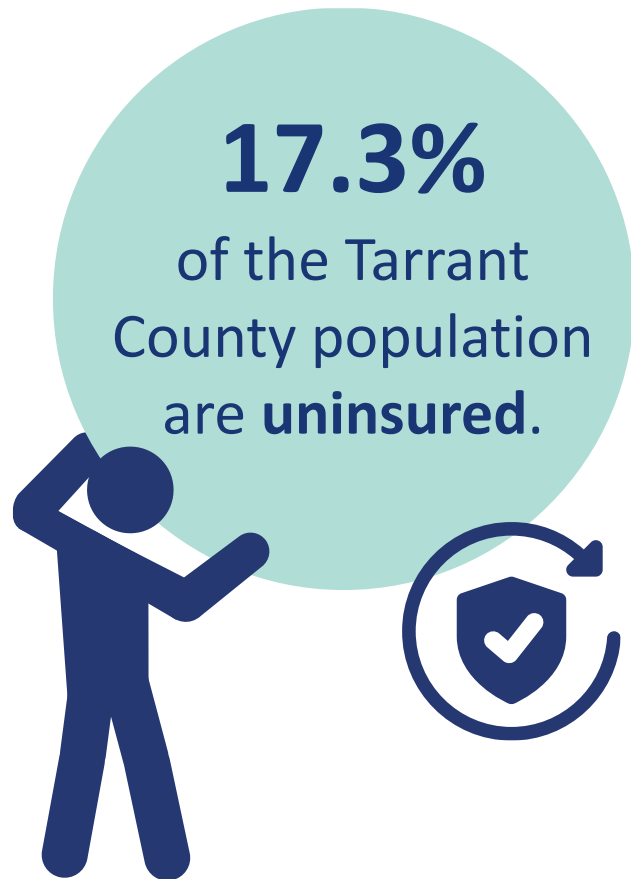

People of color are significantly younger.

Among Hispanics, more than **1 in 3 (34.4%)** are under 18.

For non-Hispanic African-Americans, more than **1 in 4 (28.3%)** are under 18.

# Population without Health Insurance 2021

## By Ethnicity:

- 29.2% of Hispanics
- 17% of Black or African-American
- 13.9% of Asians
- 10.3% of Non-Hispanic White

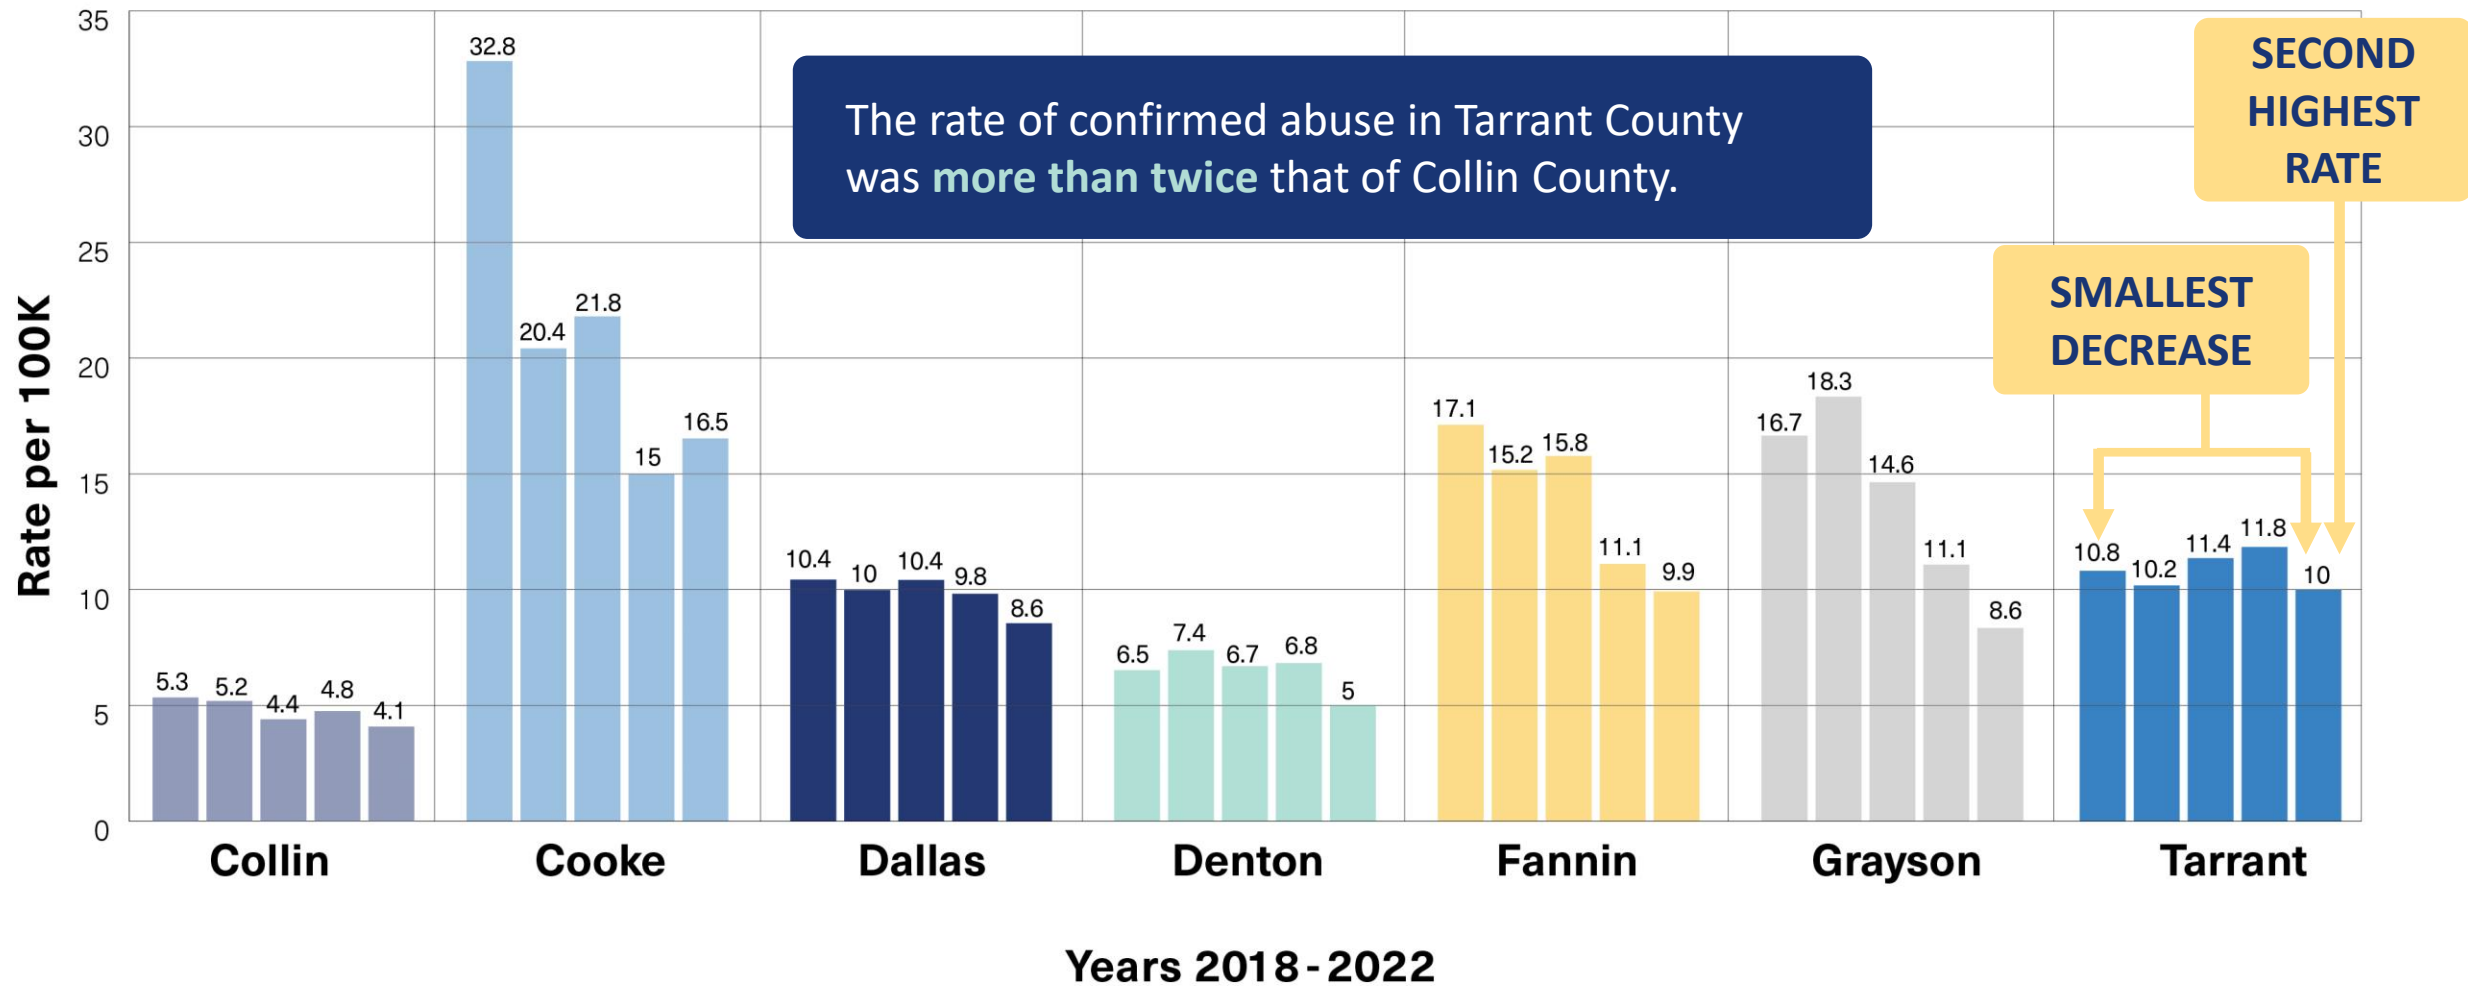

Approximately  
**1/3 of Hispanics**  
are uninsured.

## By Age:

18-24-year-olds  
have the highest  
uninsurance  
rates at 26.9%.

25-54-year-olds  
were second  
highest with 24.1%  
without insurance.

# Confirmed Victims of Abuse and Neglect - Rate

# Confirmed Victims of Abuse and Neglect - Victims

County	Statistic	2018	2019	2020	2021	2022	2018-22 Change
Tarrant	Victims	5,842	5,536	6,203	6,511	5,506	-5.8%
Collin	Victims	1,340	1,328	1,149	1,278	1,096	-18.2%
Cooke	Victims	312	195	210	148	163	-47.8%

Tied with Dallas County, as lowest percentage of students receiving OHI.

# Emergency Room Encounters for Psychiatric, Alcohol & Drug-Related Reasons

# Inpatient Encounters for Psychiatric, Alcohol, & Drug-Related Reasons

# Death by Various Causes

Number (Rate per 100k)

Type	2018	2019	2020	2021	2022	2018-22 Change
Drug Overdose – Accidental	168 (8.3)	164 (8)	298 (14.4)	399 (19.1)	404 (19.3)	140.5% (132.2%)
Drug Overdose – All Others	0 (0)	21 (1)	17 (0.8)	17 (0.8)	17 (0.8)	
Drug Overdose – Suicide	21 (1)	18 (0.9)	17 (0.8)	29 (1.4)	36 (1.7)	71.4% (65.5%)
Firearm-Related	243 (12)	265 (12.9)	320 (15.4)	355 (17)	310 (14.8)	27.6% (23.2%)
Motor Vehicle Traffic Related	223 (11)	217 (10.6)	217 (10.5)	295 (14.1)	256 (12.2)	14.8% (10.8%)
Suicide – Any Method	282 (14)	282 (13.8)	266 (12.8)	317 (15.2)	300 (14.3)	6.4% (2.7%)

The rate of accidental drug overdose more than **DOUBLED**.

# National Prevalence and Estimated Local Number of Persons with Behavioral Health Conditions

# Number and Rate of Providers for Behavioral Health Services

Number (Rate per 100k)

Provider Type	2018	2022	2018-22 Change
Behavior Analysis	135 (6.7)	851 (40.7)	530.4% (508.7)
Counseling	1,456 (72.1)	2,318 (110.8)	59.2% (53.7%)
Developmental Pediatrics	3 (.2)	4 (.2)	33.3% (28.7%)
Mental Health RN-CNS-NP	93 (4.6)	198 (9.5)	112.9% (105.6%)
Psychiatry	217 (10.7)	245 (11.7)	12.9% (9%)
Psychoanalysis	1 (.1)	1 (.1)	0 (-3.4%)
Psychology	291 (14.1)	334 (16)	14.8% (10.8%)
Social Work	494 (24.5)	807 (35.6)	63.4% (57.7%)
Therapy	93 (4.6)	145 (6.9)	55.9% (50.5%)

**LARGEST INCREASE**

# Summary of Data

- There is an **increase in behavioral health concerns** among the general population and more people are dealing with anxiety and depression.
- There is an **increase in demand for mental health** services.
- **Rising trends of self-medication** are evident including drug overdose, alcohol abuse and suicide.
- **Self-medication among adults negatively impacts children**, but the child abuse data is not telling us the whole story.
- Providing accessible **culturally competent services** is critically important with our shifting demographics.

# Questions

Do we have systems in place at the lowest levels of concern?

Do we have the right providers?

Do we have sufficient infrastructure for patient transfers between care levels?
